

**Tronox Mine Sites R6/R9  
Highways 509 and 605  
Cibola and McKinley Counties, New Mexico  
Daily Report**

**Date:** December 22, 2015

**Team:**

Patrick Buster  
Yellow Jacket Drilling

**Health and Safety:**

1. Weston team safety topics included very cold morning weather, sub-zero wind chills, moving casing, sunburn, pinch points, watching for pressure hazards, as pressure increases with depth as we advance the borehole.

**Activities Completed:**

1. Yellow Jacket advanced the collapsed SAG borehole to a depth of 820' by the end of the day.
2. Drilling will resume overnight in search of the San Andres limestone contact.

**Planned Activities for December 23, 2015**

1. Resume drilling the SAG borehole through the morning, perhaps early afternoon hours, depending on what activities are completed overnight.
2. Winterize equipment before demobilizing site for Christmas and New Years.

**Schedule:**

1. Demobilize afternoon of 12/23. Next rotation will resume on 1/5/16.
